AFFILIATE LINKS

One link.
Every seat counts.

Max is the company plan, so a single referral can be ten seats or ten thousand. Every company that signs up through your link is credited to you, automatically.

YOUR AFFILIATE LINK

https://privacypal.ai/max-offer.html?ref=YOUR-CODE

Swap **YOUR-CODE** for the partner code we send you at onboarding. That is the whole setup. A link for Northwind Partners would end **?ref=NORTHWIND**.

1

Get your code

We send it to you at onboarding. Use it exactly as written, with no spaces and no changes.

2

Build your link

Add **?ref=** and your code to the end of the Max offer page address.

3

Share it

Proposals, newsletters, partner pages, a QR code in a deck. Anywhere your buyers already meet you.

GOOD TO KNOW

You are credited for 90 days

Your code sits in their browser for 90 days, so a buyer who takes a quarter to decide still counts. If they later click another partner's link, the most recent one wins.

Trials are a separate code

Sales issues company-wide evaluation codes. If your buyer needs one, introduce us: a trial code and your referral code work together, so you keep the credit either way.

Your code never changes the price

A referral code records who sent the customer and nothing else. Discounts come from a separate promo code, and Max volume pricing applies on its own as the seat count grows.

Your own tracking survives

Add **utm_source**, **utm_campaign** or anything else you measure with. It rides along to signup untouched, next to your code.

WHAT YOU ARE SHARING

PrivacyPal Max, the plan for the whole company at 20 people or 2,000. From **$30 per seat a month** billed annually, falling to **$17** from 1,000 seats. Everything in Pro plus IP Protection at the source, Governance Policies on every device and agent, Private Memory the organization owns, and shadow-AI discovery on every seat.
