AFFILIATE LINKS

Your link.
Your credit.

Every family who signs up through your link is credited to you, automatically. One line to build, nothing to install.

YOUR AFFILIATE LINK

https://privacypal.ai/family/founding/?ref=YOUR-CODE

Swap **YOUR-CODE** for the partner code we send you at onboarding. That is the whole setup. A link for Alex Rivera would end **?ref=RIVERA-ALEX**.

1

Get your code

We send it to you at onboarding. Use it exactly as written, with no spaces and no changes.

2

Build your link

Add `?ref=` and your code to the end of the Founding Families page address.

3

Share it

Bio, video description, newsletter, QR code. Anywhere your people already find you.

GOOD TO KNOW

You are credited for 90 days

Your code sits in their browser for 90 days, so a family who signs up next week still counts. If they later click another partner's link, the most recent one wins.

The price never changes

Your families still get the full Founding Families offer, 50% off their first year. A partner code records who sent them and nothing else.

Your own tracking survives

Add `utm_source`, `utm_campaign` or anything else you measure with. It rides along to signup untouched, next to your code.

Shorteners and bio links are fine

Any link tool works, as long as it keeps the `?ref=` part on the end when it redirects. Paste the full link when you set it up.

WHAT YOU ARE SHARING

PrivacyPal Family, $9.99 a month for up to 5 people. Founding Families get **50% off the first year**, after a 5 day free trial and with a 30 day money-back guarantee.
